## Repairs Planned To Fire Hall

The October meeting of the Carbon Village Council was held in the village office Friday evening, October 6, with all councilors present.

Council discussed insulation and repairs to the fire hall and authorized this work to be done. Authority was also given for a complete mechanical check of the fire engine.

A communication from the Field Crops Commissioner requested appointment of a local official to inspect for presence of rats and Mr. Eli Spry was appointed to the post. S.F. Torrance was named enumerator to compile the voters' list in the village.

Council discussed the setting back of telephone poles from the right-of-way on Rosebud Street, north of Art's Auto Body Shop, and Alberta Government Telephones will be contacted in this regard.

Mr. and Mrs. Clifford Smith and family left Sunday for their home in Edmonton following a week's visit at the home of the former's parents, Mr. and Mrs. Charlie Smith.

Mrs. Dick Poole returned Monday from a week spent visiting relatives at East Coulee.

Howard Hunt returned Monday from an A.Y.P.A. conference at Camp Oliver.

Have you paid your subscription to the Carbon Chronicle? Check the label on your paper now. It bears the date to which you are paid. If your subscription is in arrears an early settlement would be appreciated.

John Wood and Duncan Code of Carbon and Frank Harris of Calgary left Monday on a goose hunt in the Acadia Valley district.

J. Coopman's Auction Sale will be held at his farm Friday, October 20. 50 head of Cattle, Tractor, Combine and other farm machinery, and household goods.

The Junior Ladies' Aid will hold a Sale of Home Cooking in the Farmers' Exchange on Saturday, October 14, from 3 to 5 and 7 to 9 p.m.

Miss Marilyn Martin entertained a number of friends Monday on the occasion of her birthday.

BINGO! starts again! Come to the Legion Hall Saturday evening, October 14, and have some fun. You may win a week's supply of grub. Under the O clickety click!

Art Weigum left Tuesday for Edmonton where he will undergo an operation on his foot.

Born in Drumheller hospital to Mr. and Mrs. Wm. Church of Hesketh on Thursday, Oct. 5, a son.

Born in Drumheller hospital to Mr. and Mrs. John Ziegler on Sunday, Oct. 8, a son.

## An Expanding Country

THOSE WHOSE MEMORY GOES BACK to the early days of the present century will recall the addition of the western provinces to what was then the Dominion of Canada. Recently Newfoundland became the tenth province, further extending the boundaries and adding to the population and resources of the country as a whole. It has been suggested that the Canadian Arctic and sub-Arctic should also be brought into the framework of confederation as have these other provinces, and there is little doubt but that at some time this will be accomplished.

### Expect Demands Will Be Made

The Northwest Territories are at present administered by the government at Ottawa, through a commissioner who is assisted by six other civil servants, appointed by the Governor-General. The Yukon Territory is represented by one member in the House of Commons, and has a local government headed by a commissioner appointed by the Governor-General and an elected legislature made up of three members. Should the Northwest Territories make representations for an elected member in the future, it is expected that arrangements similar to those made for the Yukon will be available for that area. It is expected that in time such demands will be made, although at present there appears to be no great dissatisfaction with the present system.

### No Urgency Is Now Felt

The population of the Northwest Territories is estimated at 13,000. This includes many Indians and Eskimos who at present have little interest in Canadian politics. Should these people become more concerned over public matters, or should conditions in the Territories change, creating a need for an elected representative, the precedent set by the Yukon has shown that the way will be open for such a change. Although it has been frequently suggested that the large area included in Canada's northern regions should become one or more provinces, there appears to be little urgency on the part of the people living there to bring about such a change. However, there is no doubt but that at some time in the future there will be eleven or perhaps twelve provinces in Canada.

## Funny and Otherwise

Manager's wife: "I put my husband in the hospital because of knee trouble."

Beauty operator: "Water on it?"  
Manager's wife: "No. Private secretary."

Two old timers were discussing a mutual friend.

One said, musingly: "Poor old Herb seems to be living in the past."

The other answered bitterly: "Why not. It's a lot cheaper."

Guest—Any mail for me?  
Hotel Clerk—Your name, Sir?  
Guest—You'll find it on the envelope.

Florence—Why did the little moron fill the gymnasium with water?

Lois—I don't know. Why did he?

Florence — Because he heard that the coach was going to send in a "sub".

Joan: "She thinks no man is good enough for her."

John: "She may be right."

Joan: "And she may be left."

The beggar had taken his stand by a railway station. He accosted a well-dressed man who was dashing past.

"Sorry, I'm in a hurry now," replied the man, "but I'll give you something tomorrow."

"No, that won't do," said the beggar, curtly. "You can't imagine how much money I've lost giving credit like that."

Boss — What are you doing here. I thought I fired you weeks ago.

Office Boy — I know. I just came back to see if you were still in business. 2901

### WHY SUFFER PILES

Grateful users praise quick results. Relief from Pain—and soothing comfort—from Mecca Pile Remedies. Two kinds—Number 1 for protruding Piles. Sold in tube with perforated pipe for internal application. 75c. Number 2 for external Piles. Sold in Jar, 75c. Order by number from your Druggist.

### First Pictures

Princess Elizabeth cradles her baby daughter in her arms as she poses with the child for its first pictures. At the left is the Princess' son, Prince Charles.

### MANITOBA FARMER REAPED GOOD CROP

BALDUR, Man.—Richard Dearsley, farmer in this district 40 miles southeast of Brandon, has obtained a yield of 36 bushels of Redman wheat to the acre.

Elsewhere in the district, yields are averaging below 20 bushels to the acre. Mr. Dearsley sowed his wheat on alfalfa breaking and used commercial fertilizer on his light land.

### RECEIVES GIFTS TOTALLING \$11,650

SASKATOON—Gifts totalling \$11,650 have been received by the University of Saskatchewan during the last few months, officials said.

Largest gift of \$7,500 came from the Saskatchewan Wheat Pool to assist the university's extension department in junior boys' and girls' club work.

### Can You Beat This?

An oddity in the potato family has been turned up by H. D. Readers of Woodrow, Sask. The potato measures a full 12 inches and appears to be formed of three normal size potatoes.

## Gardiner Urges Farmers To Produce Hogs

GUELPH, Ont.—Rt. Hon. James G. Gardiner, agriculture minister, urged Canadian farmers to go into hog production and put more dollars into their pockets.

At the Rotarians farmers' night banquet here, he said farmers could make more money during the next two years by feeding hogs than in any other way.

"A good eastern crop of feed grain, a good western crop of feed grain and an abundant supply of frozen western wheat," he said, "should raise the production of hogs over at least two years."

He said that Canada has had no accumulations or supplies of staple farm products since 1914. There have been temporary surpluses of potatoes, apples, honey, processed milk and cheese. Federal assistance was extended in all cases.

There had been some "very rash" statements made about butter. The government, he said, did not plan to have butter for export. Canada's butter production always had balanced her home requirements "almost exactly".

### THE TILLERS

—By Les Carroll

# When Will We Have Atom Engines?

By JOHN F. SEMBOWER  
(CPC Correspondent)

The atomic engine of the future has passed from the realm of fantasy and already has been sketched in more or less definite form by scientists at Ann Arbor, Mich., at the University of Michigan who are prepared to tackle the final details as part of a \$6,500,000 alumni-financed undertaking known as the Michigan Memorial Phoenix Project.

Paul F. Chenea, engineering mechanics authority at the university, and his research aid, Alfred R. Bobrowski, have designed a relatively small reactor (atomic engine) which might be loaded on several railroad flatcars and made a movable source of electric energy.

The fluid used to cool the power-generating pile would be hooked up to a turbine which in turn would drive a conventional type generator.

Presumably this is the same general principal as that being used by the Canadian developments at Chalk River, the U.S. Atomic Energy Commission and the U.S. Navy in their current work at Arco, Idaho, on a warship engine.

The navy also will attempt to power a submarine with such an engine, and atomic scientists have forecast that "if the fantastic difficulties are solved" these achievements might be accomplished as early as 1952. This would constitute the longest leap toward the peacetime harnessing of the atom since the discovery of atomic fission itself.

Dr. Chenea explains that there is nothing secret or "classified" about the information he and his assistant are using at the University of Michigan to link the atom with industry. However, he states that some "liaison on a secret level" with the AEC will be effected in order to avoid duplication of research and effort.

This apparently conforms with the suggestions made recently by David E. Lillenthal, former chairman of the Atomic Energy Commission, who urge that private institutions and industry be linked with pioneer research in atomic development in this country by releasing information of a non-military character which already is largely the common property of most basic research physicists around the world.

The program outlined at the university here also is strikingly similar to the announcement just made from Harwell, England, the British atomic research centre, that finishing touches are about to be applied to plans for development of a 1,000-ton reactor suitable for powering ships about the size of the liner Queen Elizabeth.

Three major types of problems in-

involved in the design of an atomic engine are slated for investigation by the Phoenix Project at Michigan:

1—What harmful effects of radiation are exerted on the materials used in the power pile, particularly at high temperatures?

2—How can the atomic pile best be shielded, particularly if the power plant is to be portable? The best shields used today are so heavy that they are major reason for pessimism in some quarters over whether atomic energy ever can be applied to an automobile.

If light-weight shields could be developed the sky literally would be the limit in developing such engines, for they could be used for airplanes and even interplanetary rockets, Professor Chenea pointed out.

3—What new materials and design techniques are required to build an atomic engine in which it is impossible, because of the radiation danger, to make repairs once it is placed in operation?

By mobilizing the entire scientific resources of a large university, the heads of the Phoenix Project hope they can mow down these obstacles.

One goal, they point out, is to achieve the prediction of Dr. Wendell Latimer, wartime director of plutonium research at the University of California, that it will be possible to develop "breeder piles" that, by turning out as much fissionable material as they burn, could produce nuclear power at the equivalent of \$3 or \$4 a ton of coal.

Although their project is described as having no military significance other than to propel ships or subs, the Michigan scientists warn that if Russia, as some authorities maintain, is concentrating mainly on beating Uncle Sam to the development of industrial atomic power, the early perfection of a workable nuclear power engine is of first importance in war or peace.

## TRY AND STOP ME!

By BENNETT CERF

Lord Halifax, a seasoned diplomat but an indifferent speaker, gave a talk to a farmers' convention in Iowa while he was Britain's ambassador to the United States. At its conclusion, the chairman said, "Milord, you're making a noble contribution to amicable relations between your nation and ours—at least, as far as Iowa is concerned. Before we heard from you, we were scared to death of the British. We thought you always could outsmart us. But heck, after tonight, we'll never be scared again."

A druggist met an old customer on the street and asked, "Well, Tom, did that mudpack I suggested improve your wife's appearance?" "It did for a couple of days," replied Tom mournfully, "but it wore off."

## BIRD DAMAGES PLANE

CALCUTTA.—A flock of vultures forced a Scandinavian airliner to turn back to Dum Dum airport. One of the birds flew smack into the machine. The plane, with 27 Stockholm-bound passengers aboard and a crew of 10, was said to be badly damaged.

Census figures show that from 1841 to 1931 the population of Ireland steadily decreased.

## HANDING HIM A HOT IRON

—Seibel, in The Richmond Times-Dispatch.

## RECIPE HINTS

Meal-In-One gives you a chance to use up those garden vegetables, whether fresh or leftover, in a good-tasting and attractive dish.

### Meal-In-One-Dish

One cup diced onions, 1 lb. ground beef, 1 tbsp. shortening, 1 tsp. salt, 1/2 tsp. pepper, 2 cups leftover cooked, diced carrots, 2 cups leftover cooked peas or other vegetable, 2 cups leftover mashed potatoes.

Brown onions and meat in fat. Add

salt and pepper. Place meat and onion mixture in a two-quart baking dish. Combine carrots and peas and arrange in a layer on top of meat. Top with fluffy mashed potatoes and set in a moderate oven, 350 degrees F., for 20 minutes or until the potato is browned. Serves 5.

## YOU'RE TELLING ME

By WILLIAM RITT

Central Press  
Canadian Writer

A thief swiped a coin box full of nickels. However, they were wooden—to be used in a civic jamboree. It's things like that which make the most trusting of burglars lose their faith in human nature.

Grandpappy Jenkins says he prefers spring to autumn because it's nicer to watch leaves come out than down.

Vacations over, radio performers are returning to the air. This includes all those comedians you missed so enjoyably.

The nicest thing about September, says the man at the next desk, is that it doesn't herald any autumn house cleaning campaign.

It costs more to hire a donkey than a man in Indore, India. That's what the humans get for not balking.

Guided missiles may someday follow radio beams—item. Gives us just another reason to switch off that program.

A college instructor lectured his students in an airplane during a two-hour flight. That's one way of making sure nobody is going to duck out of the classroom.

A western railroad is experimenting with chimneys instead of a horn for its Diesel locomotives. To anti-noise advocates, this idea naturally rings the bell.

## Princess Anne Sets Fashion In Names

LONDON.—Princess Anne, four-week-old daughter of Princess Elizabeth and the Duke of Edinburgh, already has set a fashion—in names.

London Registrars report hundreds of baby girls born since Aug. 15, the day the Princess was born, have been named Anne.

Ivor Loveday, registrar of births at Edmonton, North London, where some 2,000 babies are registered each year, said parents "all seem to want Anne for their girl's second name, and they are persisting on spelling it with the 'e' on the end."

"Until Princess Elizabeth announced the name of Princess Anne it was always the other way round, parents dropped 'e' at the end of the name, condemning it as old-fashioned."

## "She's Very Lovely"—Charge Dismissed

COOKSVILLE, Ont.—Because of his "very lovely" bride, an American motorist was excused for what police called careless driving.

Berge Hoogasian of Waukegan, Ill., on a honeymoon trip through Ontario, took his eyes off the road for an admiring look at Mrs. Hoogasian. He drove through a stop street and collided with another car.

Said Magistrate T. H. Moorehead, dismissing the charge: "She's very lovely."

## On The Side : By E. V. Durling

### Men In Aprons

Do you help your wife with the dishwashing? Does she put an apron on you? If so, you have plenty of company. A recent poll indicated 82 per cent. of husbands help their wives with the dishes.

### Follow The Steak Experts

If you want to know what restaurant in your city offers the best steaks for the most reasonable prices try to find out where the baseball players eat. Ball players are great steak eaters. They are good judges of the quality of a steak. Also most of the diamond performers think it's smart to be thrifty. So they shop around to find a place that offers an unusual steak for a reasonable price.

### Compliments In The Right Places

When you meet a female wearing one of those strapless daytime dresses it's a sign she thinks she has a beautiful back. So if you want to get in her good graces just say: "You really have a beautiful back." It is not difficult to detect by a woman's actions or attire what she considers her "good points". As for examples a woman who is fond of wearing shorts thinks she has good-looking legs. A woman who smiles continuously thinks she has beautiful teeth. A woman who wears low-cut dresses thinks Lana Turner and Jane Russell have nothing on her. Keep this angle in mind, young fellow. Praise what the lady thinks are her good points and it will get you off to a good start.

### Don't Put All Your Eggs In One Basket

Perhaps you have often given thought to starting in business for yourself but have been unable to do so because of lack of capital. Ever hear of anybody starting in business with a capital of one egg? It has been done. A woman on an island in the West Indies was given an egg. She put the egg under a neighbor's hen. Soon she had a hen of her own. Then she had eggs and chickens which she sold. With the profits from this she bought six piglets. Then she had pigs of her own. She sold all but two and bought a goat. The goat had kids. She sold the kids and bought a donkey. Business increased and she bought a cow. Now she sells eggs, milk, chickens and pork and has a thriving little business. All from one egg.

### Atomic Defence

How would you like to have atomic defence equipment in the form of a heat-proof and radiation proof asbestos suit? There are such suits. United States troops in Germany have them. These troops also have been given atomic radiation detectors. This is a gadget about the size of a fountain pen. Think how these atomic defence outfits would sell if available to civilians.

### Left-Handers Are Normal

Have you a left-handed youngster? Don't try to make him right-handed. It will throw him off balance, and perhaps with serious results. I heard of a left-handed youngster whose teacher was determined to make him right-handed. She tied his left hand behind his back, forcing him to write with his right hand. The youngster became ambidextrous. But shortly after, he suffered a nervous breakdown. The doctor said it was by making him use his right hand instead of his left. The lad began using his left hand and was restored to normal.

## HEALTH

### Many Sports Hurts Said Unnecessary

The best way to avoid accidents is to be prepared both physically and mentally, says H. J. Miller of Mutual Benefit Health & Accident Association in an article—"Let's Take the Pain out of Playtime"—in Health, magazine published by the Health League of Canada.

Thousands of casualties result annually from accidents at play, states Mr. Miller, who adds that "we must begin to realize that playing is an art if you are to participate in any form of sporting activity and stay free of injuries. The fellow who keeps in condition and closely observes the normal precautions isn't likely to end up in a hospital ward with a pain-wracked body as the result of an unfortunate mishap."

The author stresses the need for good conditioning for those who want to play strenuous games, the advisability of taking it easy in the early part of the season when some sport is being taken up after a few months' layoff, and avoidance of over-fatigue which, he stresses, is one of the most frequent causes of accidents.

Children able to participate in organized sports at school or the playground, states Mr. Miller, should have the necessary equipment—pads, masks and a competent coach or instructor. Parents should take a genuine interest in the children's activities even though it means "getting out of that easy chair and putting down the newspaper for an hour or two after supper."

He admonishes the parents among his readers to "keep an eye on those youngsters. They are a great comfort in old age."

On the subject of fatigue, Mr. Miller says that when fatigue creeps in, the mind gets sluggish as do the limbs and there the stage is set for an injury. The human body can take only so much punishment, and an athlete with his "second wind" is much more useful to the team than one who remains in the contest without relief.

"When you feel fatigue coming on," he says, "take a breather. Learn how to relax completely when you're not playing."

### WELL-BALANCED COUPLE

Two ex-G.I.'s were discussing the forthcoming marriage of a buddy.

"He's gettin' a wonderfully accomplished girl," said one of them. "She can swim, ride, drive a car, and pilot a plane—she's a real all-round girl."

"Yes, they should get along fine," declared the other. "You remember, Ben learned to cook in the army."

SPECIALLY TRAINED  
R.C.A.F. flyers learn how to cope with Arctic conditions at the Air Force survival school operated in northern British Columbia and in the Arctic.

The R.C.A.F. received its first Hurricane fighter in June, 1939.

## School Child Ward Of Every Motorist

(By Phil C. Braniff in Lion's News)

Today my daughter, who is seven years old, started to school as usual. She wore a dark blue dress with a white collar. She had on black shoes and wore blue socks. Her cocker spaniel, whose name is "Scout", sat on the front porch and whined his canine belief in the folly of education as she waved "goodbye" and started off to the halls of learning.

Tonight we talked about school. She told me about the girl who sits in front of her—the girl with yellow curls—and the boy across the aisle who makes 'funny faces. She told me about her teacher, who has eyes in the back of her head, and about the trees in the school yard, and about the big girl who doesn't believe in Santa Claus. We talked about a lot of things—tremendously vital, unimportant things—and then we studied spelling, reading and arithmetic, and then to bed.

She's back there now—back in the nursery—sound asleep, with "Princess Elizabeth" (that's a doll) cuddled in her right arm. You guys wouldn't hurt her, would you? You see, I'm her daddy. When her doll is broken or her finger is cut, or her head gets bumped, I can fix it, but when she starts to school, when she walks across the street, then she's in your hands.

She's a nice kid. She runs like a deer and darts about like a chipmunk. She likes to ride horses and swim and hike with me on Sunday afternoons. But I can't be with her all the time—I have to work to pay for her clothes and her education. So please help me look out for her. Please drive carefully. Please drive slowly past the schools and intersections. And please remember that children run from behind parked cars.

Please don't run over my little girl.

## World Happenings Briefly Told

The British ministry of food is planning to create and store food reserves against the possibility of war, well-informed sources said.

Canada's flax surplus has almost disappeared and producers of linseed oil face a possible shortage, Leo Gauer of McCabe Grain Co. said.

A French foreign ministry spokesman denied a report the Maginot line would be rearmored and remanned as a second or third defence line against possible invasion from the east.

The Korean conflict has brought match hoarding to Belgium. Sales are reported 70 per cent. above normal and matches are practically unobtainable in Brussels.

The United States has restored to Mexico 69 battle flags to mark "the spirit of friendship and peace" between the two countries, President Truman said.

More than \$22,000,000 was paid out in 1949 under the Prairie Farm Assistance act to help cover some of the losses resulting from crop failures, it was disclosed in the commons.

Nearly 615,000 more Canadian families receive family allowances now than when they were initiated in 1945, the annual report of the family allowance division of the health department reported.

## Health League Announce Immunization Week Dates

Canada's eighth annual National Immunization Week will be observed from October 15 to 21, it has been announced by Miss Mabel Ferris, secretary of the National Immunization Committee of the Health League of Canada, which annually sponsors this important health education event.

Designed to give impetus to the year-round campaigns of the Health League and the official health departments aimed at eliminating the contagious preventable diseases, National Immunization Week is directed at parents and guardians of children who have not been given proper immunization protection against such ailments as whooping cough and diphtheria.

"Continued need for such observances as National Immunization Week can be seen in the 1949 death toll from whooping cough and diphtheria alone," says Miss Ferris. "Both preventable diseases, they claimed 281 lives—a needless loss of Canadian child life. The need also for protection against smallpox and tetanus, or lockjaw will be stressed during the 'Week'."

## Hundreds Of Antelope In Montana

LEWISTOWN, Mont. — Residents reported they saw hundreds of antelope bunched along the south bank of Fort Peck Lake on the Missouri River. The theory is they crossed the river from the north bank last winter on the ice and haven't been able to return. Ranchers wish they would. The antelope are eating more than their share of grass and cattle are doing without.

**WHAT FUN!**—Snug in a box behind the boss and roaring along the merry old highways, Tex., the rat terrier, finds life is just one fast clip after another. With motorcyclist Marcel Desjardins, of Montreal, the midget pup has already covered 5,000 miles in four short months, and is raring to go some more when the boss steps on the gas.

## KITCHEN MEDITATIONS AUTUMN'S GIFT

By JANE DALE

Autumn offered me a golden day  
With mellow skies and flaming trees;  
With asters blooming by the walk,  
And with a hint of summer in the breeze.

I took this gift within my hands.  
I went abroad to view the day;  
Left all my duties and my cares  
To witness autumn's fine array.

Autumn graciously bestowed her gift  
To a care worn heart; with a lilting song  
As graciously I treasured it  
And sought its beauty all day long.

To Live Right — Eat Right.

## ODD STORIES IN THE NEWS

It was most confusing when a letter arrived at the town of Maryfield, southeast of Regina, addressed simply to Mr. and Mrs. Longman. There are 34 persons, including 10 married couples, in the postal area bearing the Longman name.

A new-type wedding conveyance was seen on Regina, Sask., streets when a newly married couple drove through the city in a half-ton truck instead of the usual automobile.

And instead of the usual old shoes and tin cans trailing on the ground behind, there were several wheat sheaves.

The "just married" signs were standard.

You have to make a down payment on a used car now, but one New Jersey dealer offered other inducements. Used car purchasers at his lot, he advertises, will get "free household gifts to the ladies" and "free drinks on the house".

## FAMOUS PIANIST

The famous pianist Domenico Scarlatti delighted in pieces requiring the crossing of his hands until he became too fat to do so.

To Live Right — Eat Right.

## Weekly Tip

### REMOVE RUSTY NAILS

Q. How can I loosen a screw or nail that has become rusted in wood?

A. Apply a little hot paraffin to the nail or screw; let the paraffin soak in for a short time and the nail or screw will easily yield.

## FARM MECHANICS

Edited by Prof. L. G. Heimpel  
Agricultural Engineer, Macdonald College, Que.

GOOD strong construction is needed for feeding racks, specially when they are to be used for cattle. The accompanying diagram shows a hay feeding rack for cattle. This rack is portable, and may be used for either inside or outside feeding. For sheep a rack of somewhat lighter construction may be used but the proportions should be the same. Grain may be fed on the floor of the rack.

To calculate the capacity of a rectangular bin in bushels of grain or other dry material measure the length by the width by the height to bring it to cubic feet, then multiply it by 4 and divide by 5 to bring it to bushels. The result is approximately, though not entirely correct, as there are actually 1.28 cubic feet to the bushel, whereas the above rule is based on 1 1/4 (1.25) cubic feet per bushel.

Drawing shows dimensions for construction of cattle feeding rack.

Deaf Children  
Under Six  
Learning To Speak

**DOMINION HOPEFULS** — Here are four members of the Canadian Maccabiah team which flew to Israel to participate in the world Jewish Athletic Festival. Left to right are: Syd Kastner, swimmer; Benny Lands, basketball; Jerry Shears, boxing; Fred Oberlander, captain and wrestler.

**AUSTIN SHOWS RUSSIAN GUN TO U.N.** — A 1950 Russian-made machine-gun offered in evidence to the U.N. Security Council at Lake Success, N.Y., provides a dramatic moment for U.N. delegate Warren R. Austin in his reading of Gen. MacArthur's fourth report on the Korean war. Yugoslavia's delegate, Ales Bebler, (right), avoids looking at gun, which was captured by American troops from North Koreans. Austin holds the weapon which he had pulled from beneath the table to prove that Russia is supplying guns to the Korean Reds. — Central Press Canadian.

**CANADIANS BACK FROM KOREA** — Sub-Lieutenant (S) Douglas C. Sherlock, R.C.N. (R), and Sub-Lieutenant William S. T. Jackson, R.C.N. (R), Edmonton, Alberta, first Canadian naval men to return from the Korean war zone, look over a few of the many souvenirs they brought back with them. Now back at their studies, Sub-Lieutenant Sherlock at the University of British Columbia and Sub-Lieutenant Jackson at the University of Alberta, they were happy to be home but sorry they couldn't stay until it was all over.

**MAY SOLVE VETERANS' HOME BUILDING** — Success of a co-operative house-building plan in Ottawa may make it possible for half-a-million war veterans to build their own homes with little or no down payment. The plan in Ottawa, has 29 veterans building 29 houses under V.L.A. and National Housing help and direction. Here, V.L.A. construction superintendent Morris Goodwin, (right), uses a house model to demonstrate the fine points of building to his "students" who expect to move into homes they have built themselves by next spring. — Central Press Canadian.

**EVERYONE WORKS AT HARVEST TIME** — No amateur at farm harvests, Mrs. Gerald Craig of North Gower, Ontario, digs in with a pitchfork to help her farmer-husband with his fall crops. Equip farms with this kind of hired help and the farm labor problem would be licked overnight! — Photo by Malak, Ottawa.

**DANISH ROYALTY WEDS** — Prince George, 30, of Denmark and his bride, Viscountess Anson, 32, niece of Queen Elizabeth, photographed after their recent marriage.

**BRITISH PM'S DAUGHTER** — Miss Felicity Ann Attlee, daughter of British Prime Minister Clement R. Attlee, walks to a boat for a trip off coast of Levanto, small town on the Ligurian Riviera in Italy. Miss Attlee vacationed at Levanto as the guest of Italian industrialist Enrico Stabile.

**SHARING A JOKE WITH FORMBY** — His Excellency, the Governor-General, backstage at Ottawa with George Formby, the world-famous English singing comedian. It looks as if the latter has just told Lord Alexander his latest tale fresh from Lancashire.

## Canadian Fashion

**"TOWN DRESS"** — Pure silk taffeta in navy and lime check has collarless neckline softened by 'bib' yoke. The flared skirt swings in wide mass of front gathers. 2901

**TRIED IN KOREA, PROVES ITS VALUE** — While Korea has been a testing ground for Russian arms and war psychology, it has been the same for U.S. arms and tactics. Here is one of the items whose value was proved in troop-strafing and tank busting — the "Tiny Tim" aerial rocket originally made as an anti-submarine missile. — Central Press Canadian.

**LEARNING TO SPEAK** — Most children of five years are veteran talkers but for deaf kiddies it's not so easy. Above a little girl is receiving lessons in lip-reading and speech similar to those which will soon be featured here in a special class for deaf tots under six years of age.

# FOREST HIGHBALL WITH A KICK : : :

It's A Method Of Clearing  
Trees Cheaply And Quickly

By RICHARD H. SYRING  
(CPC Correspondent)

**HUNGRY HORSE, Mont.**—Eight-foot steel spheres, weighing four and a half tons, are something Paul Bunyan, the legendary strong man of the Pacific Northwest forests, probably would have used for bowling balls.

However, the mythical giant logger didn't have these big steel balls, in the days he and his equally mythical blue ox, Babe, roamed the woods. They are the innovation of two land-clearing contractors.

Since the beginning of logging, one of the problems has been how to clear timbered and logged-over land economically. Felling a tree for lumber is a fairly simple task. But what to do with smaller trees left standing or trees ravaged by fire, so the land can be cleared and put to other uses?

Two men from Redding, Cal.—S. L. Wixson and J. H. Trisdale—are sure they have the answer.

At first they developed the idea of using up to a two-inch wire cable to clear the land. A pair of diesel tractors were utilized to drag approximately 500 feet of cable through a burned-over area, snagging down all the trees and brush caught in its loop.

That system worked fine on a 7,210-acre tract the two companies had for clearing burned-over land. This is part of the 22,500-acre tract being cleared for a reservoir behind Hungry Horse dam.

Then came a new contract. Much of this land had been logged over, and logged-over land leaves stumps—and stumps catch cables easily. So Wixson and Trisdale devised the use of the giant steel balls. The balls' primary task is to keep the cables high enough above the ground to prevent snagging on stumps. They hold

the cables up four feet from the ground.

The "highball" operation, as the land-clearing method already has been dubbed, has proved highly effective. The big balls not only hold up the cables, but the additional leverage applied when the cable catches large trees, four to five feet above the ground, is much greater than when the cable is dragged on the ground.

Contractors have found that one pair of tractors pulling one ball can snag down all the trees on a heavily-timbered area of nearly 200 acres in four hours, if the ground is fairly level. That speed is unsurpassed in any other operation.

The average daily production for one pair of tractors and one ball working under varying conditions including steep hillsides and marshy ground has been nearly 100 acres per eight-hour shift.

The speed and efficiency of the "highball" clearing operation is aided by winches on the tractors. Tractors are anchored against trees or stumps when the ends of the cable on the winches are run out. Then the reeling in of the cable starts.

As fast as a man can walk the cable and ball are brought crashing through the timber felling all caught in the loop. Since the 22,500 acres eventually are to be covered by water, removal of the stumps is not necessary.

This new method also offers safety. "Tractor operators," explains Wixson, "can always stay well clear of the area in which trees are falling."

Once the timber is down, teams of tractors with bulldozer blades move in to stack the trees and brush for burning. The sawable timber is dragged to the roadway for trucking to sawmills.

—Central Press Canadian.  
Cable, Attached to Eight-foot Ball, Slices Through a Big Tree

## GEMS OF THOUGHT

### AUTHORITY

When the righteous are in authority, the people rejoice; but when the wicked bear rule, the people mourn.—Proverbs 29:2.

To overcome all wrong, it must become unreal to us; and it is good to know that wrong has no divine authority; therefore man is its master.—Mary Baker Eddy.

The universal and absolute law is that natural justice which cannot be written down, but which appeals to the hearts of all.—Victor Cousin.

Five things are requisite to a good officer—ability, clean hands, despatch, patience, and impartiality.—Penn.

A man may have authority over others, but he can never have their heart, except by giving his own.—W. Wilson.

Nothing more impairs authority than a too frequent or indiscreet use of it.—Shakespeare.

### Smile Of The Week

He (taking her in his arms)—Oh, darling, I love you so. Please say you'll be mine. I'm not rich like Percival Brown, I haven't a car, or a fine house, or a well-stocked cellar, but, darling, I love you and I cannot live without you.

Two soft arms stole around his neck and two ruby lips whispered: She—And I love you, too, darling, but where is this man Brown?

Well done is better than well said.

### NOISE AFFECTS SLEEPER

**CHICAGO.**—You may think you can sleep with noise around you but you can't—at least not very restfully, the National Association of Bedding Manufacturers says. Even after you fall asleep, your muscles will get tense at the sound of thunder or an automobile horn and you'll wake up tired, the association said.

To Live Right — Eat Right.

### Bringing In The Harvest

Besides the familiar scene these days of tractors and combines gathering in crops over the prairies, the comparatively new device, the mechanical fork can also be seen piling straw for winter bedding of cattle. The above scene was taken at Osborne, Manitoba.—Central Press Canadian.

**GREEK ARCHBISHOP**—Well-known for his vigorous opposition to communism, Archbishop Michael of the Greek Orthodox archdiocese of North and South America, is seen here shortly after his arrival recently from New York to participate in the silver jubilee of the Holy Trinity Greek Orthodox Church in Montreal.

## Lethbridge Team Gets Chance To Travel Europe

**VANCOUVER.**—Lethbridge Maple Leafs, western intermediate hockey finalists last winter, have been named to represent Canada in a European tour this winter.

"Lethbridge will be offered the trip," President Doug Grimston of the Canadian Amateur Hockey Association said.

It is planned to send 21 men and they will fly from Canada to Norway for their opening game.

Providing each man is guaranteed five pounds per week, the team will play in Sweden, France, Belgium, Switzerland, Denmark, Holland and of course, England and Scotland.

"Our biggest problem," said President Grimston, "is making arrangements for hockey sticks."

Last year Edmonton Mercurys, another intermediate team, represented CAHA abroad and won the European world's hockey championship.

## Helpful Hints

Some scratches on furniture, if they are light, may be concealed by rubbing them over with linseed oil, turpentine and white vinegar combined in equal proportions. There are also special products manufactured for the purpose.

Clean candles by wiping them with a soft cloth dampened in alcohol. Place candles in the refrigerator several hours before lighting to make them burn longer.

Scissors Dull? A quick and easy way to sharpen them is to cut through a piece of sandpaper once or twice, and the blade's as good as new.

To protect knees and skirt while you're scrubbing the floor, cut away one side of a grocery carton and kneel in the box.

### GIVE MORE MILEAGE

**CHICAGO.**—Cars these days go four times as far as they did a quarter-century ago without wearing out. The Chicago Motor Club says the average car today is scrapped after 120,000 miles as compared to 25,000 miles in 1925.

Girls learn to read earlier, faster and with more understanding than boys.

## How To Save Your Life When Fire Strikes

"In case of fire, keeping your head will probably save your life," the Saskatchewan Fire Commissioner says in a Fire Prevention Week statement.

Many lives are needlessly lost each year because fire victims do not know what to do in an emergency. Here are fire safety tips:

1. Keep your bedroom door closed at night especially if you are staying in a strange building or a hotel. Transoms should be kept shut also. This eliminates the possibility of hot gases and poisonous smoke entering your room in great quantities while you are sleeping.
2. If you are awake and smell smoke, do not rush into the hallway. First, test the door with your hand. If it feels hot the hallway is full of dangerous smoke and you are much safer in your bedroom. Open the door slightly if it is not hot to test for pressure. If it does not feel hot and there is no pressure, you may crawl through the hall to safety. Close the door behind you.
3. Should you find the door hot and smoke coming into your bedroom from the crack beneath the door, stuff the crack with cloth or a sheet, after having first wet this material should there be any water handy in your room. Open the bedroom window slightly and yell for help.
4. On entering a strange building, make it a point that two known ways of exit are familiar to you. It is unlikely that both escape routes will be cut off by fire at the same time especially in the early stages of the fire. The Fire Commissioner suggests that you do not attempt to jump to the ground if help is on the way and that you never return into a burning building to save pets or valuables since there are trained men on the job for this purpose. **THINK OF HUMAN LIVES FIRST.**
5. Should you be an observer of a fire where humans are known to be trapped in a room, make it a point to notify the Fire Chief upon the arrival of the fire equipment that a person is trapped in that location. Quick notification may mean the easy rescue of a trapped person.

## SPORT

### First N.H.L. Game Opens In Detroit

**MONTREAL.**—New York Rangers and Detroit Red Wings will pry the lid off the 1950-51 National Hockey League season at Detroit on Wednesday, October 11. These same two clubs closed the 1949-50 season at Detroit on April 23, with Detroit winning the Stanley Cup.

The opening on October 11 is the earliest in history, beating by one day the opener in Detroit a year ago. The curtain will come down on the 1950-51 championship schedule on Sunday, March 25. Each team will play 70 games this season, the same as they did last year.

Hockey will make its 1950-51 debut at Montreal on Thursday, October 12, with Canadiens playing hosts to Chicago Black Hawks. On Saturday, October 14, the new season will be ushered into the Toronto Maple Leaf Gardens when the Leafs meet Chicago. The Black Hawks open the new season in both Canadian cities this year.

On Sunday, October 15, two American clubs play their initial game of 1950-51, with Boston fans getting a preview of the Bruins against Montreal Canadiens and Chicago fans getting their first peek at the reorganized Black Hawks against the New York Rangers.

New York Rangers, last team to open their season at home, will play their first game this season before home town fans on Wednesday, October 25. Their opposition will be the Boston Bruins.

Wednesday, Thursday, Saturday and Sunday nights appear the most popular playing dates by the six N.H.L. clubs. Montreal plays all their games on Thursdays and Saturdays. Canadiens have 13 Thursdays and 22 Saturday contests.

Toronto Maple Leafs play 11 games on Wednesdays and 24 on Saturdays. New York Rangers play 17 times on Wednesday and 18 times on Sunday. Chicago Black Hawks play 17 of their home games on Sunday and 15 on Thursday.

Boston Bruins and Detroit Red Wings have the most diversified schedule at home. Bruins play two games on Monday, nine on Wednesday, eight on Saturday and 16 on Sunday, while Detroit plays games on every night of the week except Friday. The Wings play three times on Monday, twice on Tuesday, twice on Wednesday, nine times on Thursday, six times on Saturday and 13 times on Sunday.

Toronto Maple Leafs play 23 doubleheaders. This means that on 23 occasions they play on successive nights. Rangers and Boston play 22 twin bills, Canadiens 21, Detroit 19 and Chicago 18.

Three times during the 210-game National Hockey League season, Toronto and Detroit play four games in five days. Canadiens and Rangers do this twice, while Boston and Chicago only do it once each.

### FOUND THE CULPRIT

**BURTON - ON - TRENT, Eng.**—Housewives have been finding their washing lying on the ground too often for a coincidence. A lookout finally saw Jacko, a pet jackdaw, settle on a clothes line, pull all the pegs and fly away cawing with delight.

The average human heart beats more than 2,750 million times in a lifetime of 84 years. 2901

Be sure to write plainly your Name, Address and Pattern Number.

### CANADA'S FIFTH AIR FORCE

The R.C.A.F., which was officially created in 1924, is actually Canada's fifth air force.

## OUR COMPLETE SHORT STORY—

## Small Change ::

By HAROLD HELFER

THE main thing, Sam Lucini told himself as he watched Small Change crossing over, is not to get rattled. They were bound to bring him in for questioning. After all, it was pretty well known that he and Al Murphy were mixed up in the numbers game. So when they found Al's body they'd want him for a chin at headquarters. Strictly routine.

Still, Sam had to admit, it was sudden. It hadn't been more than a couple of hours since he'd sunk the shaft of steel under Murphy's heart. He'd been jittery on the way back from Al's apartment. Turned off the wrong street once and almost climbed up on the curb parking by his office. But he had himself under control now. His lips even twisted into a smile as he watched the stolid figure of Officer Johnson ambling for the door marked "Sam Lucini, Confidential Advisor".

That was a neat touch, that "Confidential Advisor". It had imagination. That was the difference between him and Johnson. He'd called Johnson Small Change when they

were at school together. In school Alec Johnson never had wanted to get in on any of the warehouse night prowls. Now, for years, he'd been pounding a beat. Whereas he, Sam Lucini, who had been surging up the ladder all along, two hours ago had become an undisputed power.

"Hello, Small Change," Sam Lucini greeted.

The policeman made with an easy-going smile. "Well, it looks like I've finally got something on you."

"About time, isn't it?" came back Sam. "How long you been trying? Not that you're going to make anything stick."

"I'd say we got you this time, Sam."

Sam frowned. Maybe the detective department knew something, but surely they'd never let a patrolman like Small Change in on it. He was just a messenger boy.

Could he have somehow given himself away? It was fantastic. He'd been over everything too carefully. Still—you never know.

All right, let the worst happen. Let them pin him to the crime. With his reputation, he was bound to get something. But Murphy had a bad rap too. Sam could plead self defense. No price was too big to pay for the No. 1 slot in the numbers game. Of course, it could be a couple of years... But maybe the cops were bluffing.

"This is one rap you won't beat, Sam."

The officer said this in a good-humored way. Sam put on his coat. "I'll get my hat and be with you, low man on the shamus pole," Sam said.

Maybe, the thought kept coming to Sam, the thing would be to beat the law to the punch. To own up before they could paste it on him. That would be playing it smart and safe. But he'd have to move fast.

"All right," he said, "I'm ready but I want you to know that I'm going of my own free will. I was going down to headquarters anyway. I just stopped by to get my things in order. I killed Murphy but I did it in self defense."

An hour later he was telling his story to the police stenographers. The detective chief didn't seem particularly impressed by Sam's stress of the defense theme. "Your story is as full of holes as a sieve," he told the racketeer. "But thanks for saying that you killed Murphy. Also for the tip that he'd been killed."

Sam's face turned white. "You mean you didn't know... but why did you send someone around... I don't get it..."

"You would Small Change me," spoke up Officer Johnson, not without the hint of a grin. "I was only going to give you a ticket for parking too near the fireplug."

(Copyright Wheeler Newspaper Syndicate)

## BRITAIN BOOSTS PAY ON FARMS

LONDON.—Britain's Central Agricultural Wages Board, a government body, boosted the minimum wage for male farm laborers to £5 a week—a boost of six shillings. Women workers will get £3 9s instead of £3 4s.

## DAN CUPID ON STRIKE?

VICTORIA.—Is Dan Cupid going on strike, too? Provincial health department reports 303 fewer marriages in the first six months of the year than in the January to June period of 1949. This is in the face of an increase in population, too.

## LARGE ELEVATOR

LETHBRIDGE, Alta.—The largest single-unit grain elevator in Alberta was opened recently three miles south of here. Costing \$80,000, it has a capacity of 120,000 bushels.

## PEGGY

## Graduate Engineer

—Central Press Canadian.

The machine age has caught up to Dobbin. Horses in Miami, to get a drink, have to learn to push a lever with their noses and out comes a stream of cool, fresh water. But what happens to a horse that never studied engineering?

## WESTERN BRIEFS

## Many Blood Donors

GRANDE PRAIRIE, Alta. — The Red Cross blood donor clinic received 312 donations of blood when it was held here. This represented 10.4 per cent. of the total population, about double the usual representation.

## Training Bird Dogs

MORTLACH, Sask. — Sleek-coated young bird dogs from Alabama have been training on sandy dunes north of here. E. M. Farrior of Union Springs, their owner, has been teaching them to flush the wily prairie chicken.

## Reluctant Inmates

NEW WESTMINSTER, B.C. — When two 15-year-olds from the Boys' Industrial Farm were escorted to the dentist, they managed to escape. The school hopes it was just the fear of the dentist; the dentist is sure the boys were getting tired of the school.

## Galloway Cattle

THE PAS, Man. — Five Galloway cattle, brought from High River, Alta., are grazing at Arthur Hanson's ranch near this northern Manitoba town. Hanson says he believes the hardy Scottish cattle will stand the harsh winter well.

## Soldier Violinist Dies

WEYBURN, Sask. — Sgt. Edward Donnelly Boyle, 65, known during the First World War as the "soldier violinist", died here. During the 1914-18 war, he carried his fiddle everywhere he went, inscribing on the instrument the names of the engagements in which he took part.

## A Little Oppressive

CALGARY.—Residents of the Nose Creek area found that the atmosphere in the district was becoming a little oppressive. When a neighbor proposed to add a horse-slaughtering house to the pigery he already ran, they complained. Health officers said the man had no permit for the pigery or for the slaughter-house.

## May Teach Russian

VICTORIA, B.C.—Russian may be taught in some of the larger British Columbia high schools, Education Minister W. T. Straith said. Because of many applications, particularly from Vancouver, for instruction in Slavonic languages, Mr. Straith said he was asking his central curriculum committee to consider introducing the Russian language.

## IMPORTANT ROLE

Forest fire patrols were an important part of the R.C.A.F.'s duties during its early days.

## SEEK TO BUILD MEMORIAL BRIDGE TO MACKENZIE KING

PRINCE ALBERT, Sask. — Prince Albert will ask the Federal Government to build a Mackenzie King Memorial Bridge to span the North Saskatchewan river here.

City Council endorsed the proposal. The late Prime Minister represented Prince Albert in the Federal Parliament for 19 years.

Mayor J. M. Quelenaire said "Mr. King had been approached on the matter during his lifetime and it would be fitting if the Federal Government dedicated a memorial of his long association with the city in the form of a bridge."

## CANCER DRIVE OVERSUBSCRIBED

REGINA. — Saskatchewan division of the Canadian Cancer Society passed its campaign objective of \$120,000 by more than \$7,000 this year, Mr. Justice Adrien Doiron, provincial campaign chairman, said.

## RADIO QUIZ PROGRAM INCREASES WORRIES

CALGARY.—The worries of W. R. Castell, head of the Calgary public library, are not confined to business hours. He received so many off-duty telephone calls at home from radio quiz program fans that he wrote a letter of complaint to the office of the city clerk. He said his staff also had been "snowed under" by enquiries from quiz fans.

From your favorite negative INCLUDING ENVELOPES as low as

20 for \$1

(plus 20¢ shipping)

Yulecards are handsome photo Christmas cards made from your favorite photo. Send us snapshots negative of child, family, home, pet, etc., with 4¢ stamp return postage and this ad. We will send FREE SAMPLE of deluxe photo Christmas card. You see before you buy. No obligation. If without negative send snapshot with 50¢ and we will make one. Negative safely returned with sample. Satisfaction guaranteed. Offer expires December 10th.

YULECARDS Box 220-28, Regina, Sask.

## Looks pretty - Tastes pretty WONDERFUL!

## Fruit Bread — made with New Fast DRY Yeast!

● Don't let old-fashioned, quick-spoiling yeast cramp your baking style! Get in a month's supply of new Fleischmann's Royal Fast Rising Dry Yeast — it keeps full-strength, fast-acting till the moment you bake! Needs no refrigeration! Bake these Knobby Fruit Loaves for a special treat!

## KNOBBY FRUIT LOAVES

● Scald 1½ c. milk, ¾ c. granulated sugar, 2 tps. salt and ½ c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ¾ c. lukewarm water, 3 tps. granulated sugar; stir until sugar is dissolved. Sprinkle with 3 envelopes Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Add lukewarm milk mixture and stir in 2 well-beaten eggs, 1½ c. maraschino cherry syrup and 1 tsp. almond extract. Stir in 4 c. once-sifted bread flour; beat until smooth. Work in 2 c. seedless raisins, 1 c. currants, 1 c. chopped candied peels, 1 c. sliced maraschino cherries and 1 c. broken walnuts. Work in 3¾ c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and

grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Punch down dough, turn out on lightly-floured board and divide into 4 equal portions; cut each portion into 20 equal-sized pieces; knead each piece into a smooth round ball. Arrange 10 small balls in each of 4 greased loaf pans (4½" x 8½") and grease tops. Arrange remaining balls on top of those in pans and grease tops. Cover and let rise until doubled in bulk. Bake in moderate oven, 350°, about 1 hour, covering with brown paper after first ½ hour. Spread cold loaves with icing. Yield—4 loaves. Note: The 4 portions of dough may be shaped into loaves to fit pans, instead of being divided into the small pieces that produce knobby loaves.

## Do You Suffer Distress From

## 'PERIODIC' FEMALE WEAKNESS

which makes you so nervous several days before?

Do female functional monthly ailments make you suffer painful distress, make you feel so nervous, so strangely restless, tired and weak—at such times (for a few days just before your period)? Then start taking Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. No other medicine of this type for women has

such a long record of success. Pinkham's Compound not only relieves this monthly pain but also pre-period nervous tension and cross, irritable emotions—of this nature. It has such a comforting anti-spasmodic action on one of woman's most important organs. Regular use helps build up resistance against such female distress. Truly the woman's friend!

NOTE: Or you may prefer Lydia E. Pinkham's TABLETS with added iron.

LYDIA E. PINKHAM'S Vegetable Compound

The Carbon Baptist Church expects to have their annual mission festival on Sunday, Oct. 15th. The Zion Baptist Church will have their Harvest mission festival on Sunday, Oct. 29th.

Mr. and Mrs. Jim Nodasdi and family of East Coulee spent the Thanksgiving weekend visiting relatives in Carbon.

Don Pattison was a weekend

visitor at the home of his father, Charlie Pattison.

Reuben Gablehouse was a business visitor in Carbon Tuesday.

### LITTLE NEWS ITEMS OF LOCAL INTEREST

Goose hunters from Carbon returned home the latter part of last week and report good luck in hunting the wily game bird. Bill Ross, Chris Thumler & Gottlieb Eslinger, who were hunting in the Castor district, bagged 13 geese. Len Poxon, Jim Flaws, Dale Poxon and Francis Poxon of Carbon and Ed Rouleau of Didsbury hunted in the Kirriemuir district near the Saskatchewan border and brought home ten geese.

The United Church Ladies' Aids will hold a Harvest Supper in the Carbon Scout Hall on Wednesday, October 18, from 5:30 to 8:30 p.m.

The annual song festival of the Baptist churches of southern Alberta will be held at the Trochu Baptist church on Sunday, October 22. The choirs of the Carbon and Zion Baptist churches and the male chorus are preparing for the festival.

The Anglican W.A. will hold a Bazaar and Sale of Home Cooking in the A. P. P. Egg Grading Station on Saturday, October 28, from 3 to 6 p.m.

Miss Grace Patton of Drumheller was married Saturday to Mr. Alex Defoor at Knox United Church in Drumheller. Miss Patton is well-known in Carbon as a music teacher and is at present conducting a class in piano here.

Mr. and Mrs. Stan Machell and family spent the weekend at the home of Mrs. Margaret Atkinson.

### UNWANTED HAIR

Eradicated from any part of the body with Saca-Pelo, a remarkable discovery of the age. Saca-Pelo contains no harmful ingredient, and will destroy the hair root.
